Jan. 3, 2018

Day 4/76

At the end of today's lesson you will;

- Be oriented to evolutionary time and introduce a broad overview of the history of life on Earth.

Classwork-

- **Evolutionary History 2.4**
- Today, Students begin to construct a foundational understanding of how long life on Earth has been evolving. This allows them to understand how descendant species from a common ancestor can be so different from one another.
- They work with a calendar analogy in which the history of Earth is condensed onto a single calendar year, allowing them to grasp the scale of time.

Homework-

- Section 2.4 Homework.
- Study the Evolutionary History Vocabulary on Quizlet.
- Vocab Test Thursday.
