

# SCIENCE

Jan. 11, 2018

Day 4/80

***At the end of today's lesson you will;***

- Review key ideas about shared structures as evidence of common ancestors, as well as to reflect on differences in structures between related species that occur as a result of speciation and natural selection in different environments.

## ***Classwork-***

- **Evolutionary History 2.7**
- Today, Students will engage in a differentiated lesson that is designed to provide students with a targeted review and exploration of key concepts and ideas; it is also an opportunity to explore new content for students who have developed full understanding of the ideas from Chapters 1 and 2.
- Student groups will begin with activities in the Natural Selection Simulation and then continue to activities in the Evolutionary History Simulation.

## ***Homework-***

- Section 2.7 Self Assessment.
