

# SCIENCE

Mar. 2, 2018

Day 4/112

***At the end of today's lesson you will;***

Explore different types of light and begin to answer the Investigation Question: Is all light the same?.

## **Classwork-**

- **Light Waves 2.1**
- Students conduct a hands-on investigation, shining an incandescent flashlight and an ultraviolet flashlight on different materials, and then observing different changes.
- Students then watch a video showing that light from the sun changes sun paper, but light from a light bulb does not.

## **Homework-**

- Complete the 2.1.4 Homework.
- Study the Light Waves Vocabulary on Quizlet.
