Day 1/113

At the end of today's lesson you will;

Practice Active Reading as they learn that there are different types of light that can change a material in different ways.

Classwork-

- **Light Waves 2.2**
- Students read “Harvesting Sunlight” as they continue to answer the Investigation Question: Is all light the same?
- Students read and construct brief summary statements to keep track of important ideas while reading, an Active Reading strategy that is highlighted in this lesson.
- Students read and annotate the article independently, then reflect on their annotations in partner and whole-class discussions.

Homework-

- Complete the 2.2.4 Homework.
- Study the Light Waves Vocabulary on Quizlet.
