

# SCIENCE

DEC. 13, 2017

Day 4/68

***At the end of today's lesson you will;***

- See That species inherit body structures from their ancestor populations and to get students thinking about common ancestor populations.

## ***Classwork-***

- **Evolutionary History 1.3**
- Today Students continue to learn about similarities between species.
- After looking at shared structures in the forelimbs of two species, students read about how body structures reveal a shared common ancestor between whales and humans.

## ***Homework-***

- Section 1.3 Homework.
- Revision of your Natural Selection Engineering Internship Final Proposal.
- Study the Evolutionary History Vocabulary on Quizlet.
