

FORCE AND MOTION

NEXT GENERATION SCIENCE STANDARDS

Feb. 11, 2019

Day 2/102

At the end of today's lesson you will;

- How do forces affect motion?

Classwork-

- Force and Motion 4.3 Activities, 1,2,3, & 5
- Students conclude the Science Seminar and the unit by writing a scientific argument about whether a difference in the friction of the surface or the masses of the model vehicles might have affected the results of the collision scene in Claire's movie. Students first consider the role of reasoning in building a convincing argument, then use the Reasoning Tool to make explicit how pieces of supporting evidence are connected to their chosen claim.

Homework-

- Complete activities 1,2,3, & 5.
