

May. 6, 2019

Day 1/153

At the end of today's lesson you will;

- *What causes climate change?*

Classwork-

- **Earth's Changing Climate 1.2**
- *This lesson introduces students to the problem they will investigate over the course of the unit, Why is ice on Earth decreasing?*
- *Students begin by reacting to statements in an Anticipation Guide that are designed to help them access what they already know about climate change and which they will revisit periodically throughout the unit.*
- *Students learn that the concepts of trend and fluctuation are important when analyzing data about climate change.*

Homework-

- *Review the vocabulary terms used in your science classes from 5 through 8th grade on QUIZLET. Begin to explore the vocabulary terms associated with our Earth's Changing Climate unit on QUIZLET.*
