

June 7, 2019

Day 3/175

At the end of today's lesson you will;

- *What causes climate change?*

Classwork-

- **Earth's Changing Climate 4.5**
- *Students complete an End-of-Unit Assessment consisting of 19 multiple-choice questions and 2 written-response questions in which they analyze and interpret data, evaluate evidence, and construct explanations.*
- *The End-of-Unit Assessment indicates where students fall along the levels of the Progress Build after instruction by measuring their mastery of the specific ideas—including unit-specific science concepts and crosscutting concepts—that comprise each level of the Progress Build.*
- *The End-of-Unit Assessment also measures students' understanding of important supporting content not explicitly included in the Progress Build.*
- *When analyzed with the Pre-Unit Assessment and Critical Juncture, the End-of-Unit Assessment results indicate students' progress over the course of the unit.*

Homework-

- *Continue to work on your final science argument on Changing Climate by using the scientific argument rubric. Arguments are due Monday.*
