

Natural Selection

Next Generation Science Standards

Nov. 8, 2018

Day 3/47

At the end of today's lesson you will:

- Why do populations change over time?

Classwork-

- Natural Selection 4.4.
- Students complete an End-of-Unit Assessment consisting of 18 multiple-choice questions and 2 written-response questions in which they analyze and interpret data, evaluate evidence, and construct explanations. The End-of-Unit Assessment indicates where students fall along the levels of the Progress Build after instruction by measuring their mastery of the specific ideas, both unit-specific science concepts and crosscutting concepts, that comprise each level of the Progress Build. The End-of-Unit Assessment also measures students' understanding of important supporting content not explicitly included in the Progress Build.

Homework-

- Get your Science folder ready for Tuesday's check.
