

Natural Selection

Next Generation Science Standards

Nov. 20, 2018

Day 2/54

At the end of today's lesson you will;

- Design a malaria treatment that minimizes drug-resistant malaria.

Classwork-

- Natural Selection Engineering Internship Day 4
- Interns conclude their background research by reading about the different antimalarial drugs available for their treatments in this MalariaMed model. Interns then run additional isolated tests to better understand the effects of different antimalarial drugs, doses, and days of treatment on the project criteria.
- To close the Research phase, interns complete the Project Summary for after-hours work, summarizing what they understand about the project so far and which will be used as the introduction to their proposals at the end of the internship.

Homework-

- Complete today's "After Hours" work.
