

EVOLUTIONARY HISTORY

NEXT GENERATION SCIENCE STANDARDS

Dec. 11, 2018

Day 2/66

At the end of today's lesson you will:

- Why do species, both living and extinct, share similarities and also have differences?

Classwork-

- Evolutionary History 1.4
- Students continue to learn about similarities between species. After looking at shared structures in the forelimbs of two species, students read about how body structures reveal a shared common ancestor between whales and humans. The teacher models a new Active Reading strategy: summarizing. Students discuss the text by reflecting on their annotations. For homework, students explore the Evolutionary History Simulation.

Homework-

- Complete the Evolutionary History 1.4.5 Homework.
- Review the Evolutionary History unit vocabulary terms on QUIZLET.
